

SANTIAGO VEIGA

Full Stack Web Developer Motion Graphics Designer

I started my career as a sound designer and after that I continued looking for a way to keep improving. So that's why, at the beginning, I have learned video editing. Later, to make animations, after that to 3D modeling, and finally, I have discovered that I was capable enough to apply programming to those jobs. Since then, I have decided to have an impact on that, focusing mainly about programming, providing my experience of the audiovisual world.

Git

Adobe
Photoshop

PROFESSIONAL EXPERIENCE

Full Stack Development

- Creation of a virtual wallet with logging session and signin with authentication, balances display, contact book, and transaction overseeing (money movement and deposit). There were used technologies like: React Native, Redux, NestJS, TypeScript and MongoDB.
- Development with agile methodology, with one week sprints and its presentations to a Product Owner belonging to the staff.
- A SPA development utilizing React and Redux. All components were made with CSS without using external libraries. The SPA consumes data from an API through a BackEnd created with Node.js employing Express, providing new functionalities to the original API.
- Few features from the project: searching cache, ordered and filtered, and a controlled form to the creation of customized activities for each country.

Motion Graphics Design

- Design and animation of post and stories for social media using brand books and following its guidelines.
- I have worked for several brands like Toyota, Gatorade, Mercado Pago, Falabella, DeWalt, Uber.
